

The present listing of the claim replaces all past listings of the claim:

Listing of the claim

1. (currently amended) A packaged detergent composition comprising a container that at least partly disintegrates in an aqueous environment, the detergent composition ~~comprising~~ consisting of at least one liquid having an outer surface and one solid substantially insoluble in the liquid and having a size sufficient to be retained by a 2.5 mm meshing characterized in that the ~~at least one solid is selected from the group consisting of enzymes, bleach, bleach activators and non-ionic surfactants, and~~ has a density lower than the density of the liquid wherein the one solid is floating on the outer surface of at least one liquid.
2. (cancelled)
3. (previously presented) A packaged detergent composition according to claim 1 wherein the at least one liquid has a dispersion/dissolution time as measured by the dispersion/dissolution time of more than 30 s.
4. (previously presented) A packaged detergent composition according to claim 1 wherein the at least one liquid has a viscosity of at least 100 mPa s.
5. (previously presented) A packaged detergent composition according to claim 1 wherein the container is a sachet.
6. (previously presented) A packaged detergent composition according to claim 1 wherein the container is essentially water-soluble.
7. (previously presented) A packaged detergent composition according to claim 5, wherein the container comprises polyvinyl alcohol.

8. (previously presented) A method of washing dishes comprising providing the packaged detergent composition according to claim 1 and releasing the detergent composition in an automatic dishwashing machine.

9. (previously presented) A method of washing laundry comprising providing the packaged detergent composition according to claim 1 and releasing the detergent composition in a laundry washing machine.

10.–14. (cancelled)

15. (previously presented) The composition of Claim 1 wherein the one solid floating on the outer surface of the liquid has a constant overall diameter of 11 mm.
